4.0 Use of Cookies and web beacons

The GlobalSign Certificate Center (GCC) uses cookies to enable the fulfillment of services. Cookies may be used when you log into the GCC, purchase products or use certain GCC functions.

In addition, like most online businesses, GlobalSign uses cookies and web beacons on our websites and through marketing related emails to gather and analyze non-personal information such as the visitor's IP address, browser type, ISP, referring page, operating system, date/time and basic geographical information.

We use cookies and web beacons to compile aggregate data about site traffic and site interaction so that we can gauge the effectiveness of our communications and offer better site experiences and tools in the future. These service providers are not permitted to use the information collected on our behalf except to help us conduct and improve our business.

First time visitors may choose to not have any activity monitoring cookies set in their browser. We use an opt-out identification cookie to tag these users as having made this decision. Those cookies that pertain to site performance, experience improvement and marketing are programmed not to execute when an opt-out cookie is present in a visitor's browser. Opt-out cookies persist until a visitor clears their browser cookies, or until their expiration one year after the set date. A visitor is required to opt out again after one year in order to disable any activity monitoring cookies.
